

# ICHIRO GENBU ICR-8211~ICR-8211R

## Description

説明

Coolant formulated with premium quality, single-phase, ethylene glycol based product. This product provides excellent heat rejecting aluminum protection for all automotive and light duty diesel applications. It also provides outstanding protection for heavy-duty diesel applications when combined with supplemental coolant additives. It protects all common cooling system metals including solder, copper, brass, steel, cast iron and aluminum. This formulation is compatible with all other major brands of coolant and will not affect automotive hoses and gaskets.

This oil is recommended for automotive and trucks cooling systems. It contains an effective defoamer to prevent foaming in the cooling system for the life of coolant.

It is recommended for use in all automobiles requiring ethylene glycol based coolant.

## Benefits

特典

- △ High quality coolant designed for use in all types of radiator cooling systems.
- △ Provides excellent heat rejecting properties
- △ Protects cooling systems under high temperature conditions
- △ Be used directly without water dilution

## Typical Characteristics

典型的な特徴

Test Description	Method	Unit	ICR-	
			8211	8211R
Density @ 15 °C	ASTM D 4052	kg/L	1.0140	1.0140
Freezing Point	ASTM D 1177	°C	-6	-6
Boiling Point	ASTM D 1120		102	102
Appearance	Visual		Green	Red
